

CEMENT

AND

LIME MANUFACTURE

Published by Concrete Publications Ltd., 14 Dartmouth Street, London, S.W.1

INDEX to VOL. XIV, 1941.

	PAGE		PAGE
Alkali content of cement, New method for determining the, by F. W. Glaze	176	Ralston, Oliver C., on The pulverisation of coal...	86
Ash as a pozzolanic material, Effect on weather resistance of concrete of fly, by R. E. Davis, R. W. Carlson, J. W. Kelly, and H. E. Davis	67	Takata, Akira, on Determining the heat evolution of cement	157
AUTHORS:		Taylor, T. C., on The hydration of magnesia in dolomitic limes	166
Ashkenazi, Gabriel A., on Notes on high-alumina cement	134	Tregoning, J. J., G. L. Kalousek and C. H. Jumper, on Potassium sulphate in cement clinker	116
Azbe, V. J., on Efficiency of lime kilns	71	Ward, G. W., on Effect on clinker of heat treatment and rate of cooling...	161
Bates, P. H., and E. P. Flint on The sugar test of Portland cement	55	Watanabe, K., on Effect of storage on Portland cement	187
Binder, J. L., and Karl Kammermeyer, on Particle size determination by sedimentation	125	Blastfurnace cement, B.S.S. for Portland	186
Bowles, Oliver, on Re-use of lime...	53	B.S.S. for Portland blastfurnace cement	186
Carlson, R. W., and R. E. Davis, J. W. Kelly and H. E. Davis, on Fly ash as a pozzolanic material: effect on weather resistance of concrete	67	Burning of cement, The influence of fluxes on the, by Steven Gottlieb	21
Davis, H. E., and R. E. Davis, R. W. Carlson, and J. W. Kelly, on Fly ash as a pozzolanic material: effect on weather resistance of concrete	67	Calcination of limestone, Rate of, by V. J. Azbe...	130
Flint, E. P., and P. H. Bates, on The sugar test of Portland cement	55	Cement, Comparative methods of grinding...	73
Forbrich, L. R., on Heat evolution of cement: control by the use of reagents	37	Control of the heat evolution of by the use of reagents, by L. R. Forbrich	37
Fritts, S. S., on The relationship of grinding to surface measurement	168	Determining the heat evolution of, by Akira Takata	157
Glaze, F. W., on New method for determining the alkali content of cement	176	Effect of storage on Portland, by K. Watanabe	187
Gottlieb, Steven, on The influence of fluxes on the burning of cement	21	in the form of pellets	36
Jaques, W., E. L. McMaster and H. M. Larmour on Properties of pozzolana	80	New method for determining the alkali content of, by F. W. Glaze	176
Jumper, C. H., G. L. Kalousek and J. J. Tregoning on Potassium sulphate in cement clinker	116	Notes on high-alumina, by Gabriel A. Ashkenazi	134
Kalousek, G. L., C. H. Jumper and J. J. Tregoning on Potassium sulphate in cement clinker	116	Sugar solubility test for	122, 141
Kammermeyer, Karl, and J. L. Binder, on Particle size determination by sedimentation	125	works in Eire, New	79
Kelly, J. W., R. E. Davis, R. W. Carlson and H. E. Davis, on Fly ash as a pozzolanic material: effect on weather resistance of concrete	67	Cements for kiln linings, Refractory, by F. E. Lathe	64
Larmour, H. M., E. L. McMaster and W. Jaques, on Properties of pozzolana	80	Clinker, Glass in cement	51
Lathe, F. E., on Refractory cements for kiln linings	64	of heat treatment and rate of cooling, Effect on, by G. W. Ward	161
McMaster, E. L., H. M. Larmour and W. Jaques, on Properties of pozzolana	80	Potassium sulphate in cement, by G. L. Kalousek, C. H. Jumper and J. J. Tregoning	116
Meyers, S. L., on Thermal coefficient of expansion of Portland cement	9	Coal firing in rotary lime kilns, Advantages of pulverised	1
		The pulverisation of, by Oliver C. Ralston	86
		Combination tube mill...	52
		Concrete, Effect of fly ash as a pozzolanic material on the weather resistance of, by R. E. Davis, R. W. Carlson, J. W. Kelly and H. E. Davis	67
		Control of rotary kilns...	19
		Cooling, Effect on clinker of heat treatment and rate of, by G. W. Ward	161
		Corrosion-proofing of metal, Building-up and	65
		Crushing of stone, Selective	107

	PAGE		PAGE
Dispersion agents in Portland cement	102	Particle size determination by sedimentation, by Karl Kammermeyer and J. L. Binder ...	125
Dry process versus the wet process in Portland cement manufacture, The	193	size, Determination of	105
Eire, New cement works in	79	Pellets, Cement in the form of	58
Expansion of Portland cement, Thermal coefficient of, by S. L. Meyers	9	Portland cement, Dispersion agents in	102
Fineness of Portland cement, Specification for measuring the	179	" cement manufacture, The dry process versus the wet process in	193
Fire rings in rotary kilns, Removal of	113	" cements, Heats of hydration of	124
Fluxes on the burning of cement, The influence of, by Steven Gottlieb	21	" cement, Specification for measuring the fineness of	179
Fly ash as a pozzolanic material: effect on weather resistance of concrete, by R. E. Davis, R. W. Carlson, J. W. Kelly and H. E. Davis	67	" cement, Thermal coefficient of expansion of, by S. L. Meyers	9
Fuel consumption of rotary cement kilns	143	" cement, The sugar test of, by E. P. Flint and P. H. Bates	55
Glass in cement clinker	51	Potassium sulphate in cement clinker, by G. L. Kalousek, C. H. Jumper and J. J. Tregoning	116
Grinding cement, Comparative methods of	73	Pozzolana, Properties of, by H. M. Larmour, E. L. McMaster and W. Jaques	89
" to surface measurement, The relationship of, by S. S. Fritts	168	Pozzolanic material: effect on weather resistance of concrete, Fly ash as a, by R. E. Davis, R. W. Carlson, J. W. Kelly and H. E. Davis	67
Heat evolution of cement: control by the use of reagents, by L. R. Forbrich	37	Preheater installation at a lime works	204
" evolution of cement, Determining the, by Akira Takata	157	Pulverisation of coal, The, by Oliver C. Ralston	86
" treatment and rate of cooling, Effect on clinker of, by G. W. Ward	161	Pulverised coal firing in rotary lime kilns, Advantages of	1
High-alumina cement, Notes on, by Gabriel A. Ashkenazi	134	Reagents, Control of the heat evolution of cement by the use of, by L. R. Forbrich	37
Hydration of magnesia in dolomitic limes, The, by T. C. Tayler	166	Refractory cements for kiln linings, by F. E. Lathe	64
" of Portland cements, Heats of	124	Rings in rotary kilns, Removal of fire	113
Kiln linings, Refractory cements for, by F. E. Lathe	64	Sedimentation, Particle size determination by, by Karl Kammermeyer and J. L. Binder	125
Kilns, Advantages of pulverised coal firing in rotary line	19	Shaft kilns, Experience with modern	22
" Control of rotary	71	Size determination by sedimentation, Particle, by Karl Kammermeyer and J. L. Binder	125
" Efficiency of lime, by V. J. Azbe	71	" Determination of particle	105
" Fuel consumption of rotary cement	143	Specification for measuring the fineness of Portland cement	179
" Removal of fire rings in rotary	113	Stone, Selective crushing of	107
Lime from water-softening plant, Proposed reclamation of	190	Storage on Portland cement, Effect of, by K. Watanabe	187
" in the glass industry	141	Sugar solubility test for cement	122, 141
" kilns, Efficiency of, by V. J. Azbe	71	" test of Portland cement, The, by E. P. Flint and P. H. Bates	55
" kilns, Rotary: advantages of pulverised coal firing	1	Sulphate in cement clinker, Potassium, by G. L. Kalousek, C. H. Jumper and J. J. Tregoning	116
" Re-use of, by Oliver Bowles	53	Surface measurement, The relationship of grinding to, by S. S. Fritts	168
" works, Preheater installation at a	204	Test for cement, Sugar solubility	122, 141
Limes, The hydration of magnesia in dolomitic, by T. C. Tayler	166	" of Portland cement, The sugar, by E. P. Flint and P. H. Bates	55
Limestone, Rate of calcination of, by V. J. Azbe	130	Thermal coefficient of expansion of Portland cement, by S. L. Meyers	9
Linings, Refractory cements for kiln, by F. E. Lathe	64	Tube mill, Combination	52
Magnesia in dolomitic limes, The hydration of, by T. C. Tayler	166	Water-softening plant, Proposed reclamation of lime from	190
Manufacture, The dry process versus the wet process in Portland cement	193	Weather resistance of concrete, Fly ash as a pozzolanic material: effect on, by R. E. Davis, R. W. Carlson, J. W. Kelly and H. E. Davis	67
Measurement, The relationship of grinding to surface, by S. S. Fritts	168	Wet process in Portland cement manufacture, The dry process versus the	193
Metal, Building-up and corrosion-proofing of	65		
Mill, Combination tube	52
